Datenanalyse

Jan-Philipp Kolb

06 Mai, 2019

Die Daten einlesen

```
static_link <- "http://www.statistik.at/web_de/static/"
file <- "mz_2013_sds_-_datensatz_080469.sav"
dat <- rio::import(paste0(static_link,file),to.data.frame=T
```

Einen Überblick über die Daten bekommen

```
head(dat)
```

asbhh	apkz	asbper	aprox	arefwo	arefwon	amonat	aquartal	a
41015080	1	4101508001	1	2013-03-17	11	3		
41029290	1	4102929001	1	2013-03-17	11	3		
41029290	2	4102929002	1	2013-03-17	11	3		
41029290	3	4102929003	202	2013-03-17	11	3		
41042090	1	4104209001	1	2013-02-17	7	2		
41042090	2	4104209002	1	2013-02-17	7	2		

Einen ersten Eindruck der Daten bekommen

```
library(dplyr)
glimpse(dat)
```

```
